

MISS A. MACPAIL M.P. K. B. SANDWELL TO SPEAK HERE

Gleichen will have the privilege of hearing Miss Agnes MacPail, M.P., in November, and Mr. K. B. Sandwell, one of Canada's leading economists, or about the 20th of this month.

These speakers are being invited by the supporters of the Canadian Club and the executives of the Gleichen branch. It is very fortunate in being offered such outstanding speakers.

Miss MacPail needs very little introduction. She is an international personage now, a very good speaker and her subject will be "Canada and the Unemployment Problem". Years ago she was the first woman to be elected to the House of Commons.

Mr. Sandwell needs no introduction to many people as he writes frequently for Maclean's Magazine and The Toronto Saturday Night. He is first an economist and next he is a humorist who can talk as well as he can write. He is on a speaking tour throughout Western Canada. He is an experienced and fluent speaker combining a sense of humor with the grasp of the subject. He has spoken to numerous Canadian Clubs in the East, and has been invited to return on many occasions.

His principal subject is "Unemployment Insurance". He has made a very considerable study of this subject and was engaged by a number of business to make a survey of its economic aspects. He has alternative subjects as follows: "The Problem of the Divided Sovereignty", "The Problem of the World Depression", "The Arts and Crafts of Canada".

What time would he speak? A phone or a letter to this paper will pass on to the Canadian Club executives. He has alternative meetings as yet made. Nothing is certain, but it is the meeting will open to the public.

Watch for notice of definite date and keep it open. You won't regret it.

UNITED CHURCH HOLD SPECIAL RALLY SUNDAY

A special rally of the congregation of the United Church is being planned for next Sunday, September 20th. In the morning the usual Holy Day program will be read. There will be special music and Rev. Mr. Eggar will preside at the altar. At 10 o'clock in the morning the church will be open to all. Mr. Gilbert will be in charge of the service. The service will be held at the church. The service will be held at the church. The service will be held at the church.

INTERESTING NEWS ITEMS OF MILK HAPPENINGS

Mr. Ferguson, former M.P., who is now living on his farm south of M.P., has returned.

Mr. Martin, mother of John Martin and Edna Bonetto, has returned and is now living in M.P. again.

The prohibition problem has been solved as far as the farmer is concerned and we can no longer afford to get into the 10 cent glass of beer and if it was not for the men working on the section and the few people in town who pull down a monthly salary, the beer business would be well up.

Mr. W. Hill, former rancher in the M.P. hills, will know all about it. He has returned from a trip to Ireland his birth place. Mr. Hill came to M.P. last week and was expecting to meet Mr. Hill. He is coming up from Long Beach, Cal. after they have landed at the year. After they expect to come back to Long Beach again.

Some of our absentees last week who generally visit us once a year have appeared on the scene. Among them are Tony Beggs, Jack Anderson and his son Louis, who are living in Long Beach, California. Mr. Anderson is a well known figure at home. Mr. Anderson is a well known figure at home. Mr. Anderson is a well known figure at home.

SCHOOL FAIR HAS MANY FINE EXHIBITS

Thursday the Gleichen School Fair was held here for the first time in three years and was a real success. The entire district participated in the same. While in former years Indian Department Schools were competing for the fair, the Gleichen exhibits compared well with other districts considering that this is the first fair held here for some time. Inspector Boyd and Mr. Benn addressed the gathering shortly at the close of the judging. Mr. W. S. Benn judged the roots and vegetables. Inspector Boyd, with three assistants was in charge of the schoolwork. Miss G. M. Pokotilo of the Carleton Place school staff judged the cooking and sewing exhibits and Mr. John Englehart took charge of the grains and livestock competition. Sports were held in the afternoon and great weather conditions. Great credit is due to the school for the fair. It will be a permanent event to be looked forward to in the future. We hope we will be able to print the list of prize winners.

BOARD OF TRADE HOLD SHORT SESSION MONDAY

The Gleichen Board of Trade held short session Monday evening in the Club Room of the Community Hall. Among the correspondence was a letter from Edmonton stating that the town planning expert Harry Seymour wished to speak in Gleichen on "Problems of Urban Communities". It was decided to defer action for a time on motion of Messrs. Brown and McKay. It was decided to ask Mr. R. A. Umbricht to speak on the grade on the hill northwest of town near the oil fields, graded and put in good shape. A vote of thanks was extended to Mr. J. R. Davies for his efforts in taking the boys to camp at the river this season.

Another motion was made extending an invitation to Mr. Reader of Calgary to come to Gleichen in March 1932. Messrs. McKay and Mattson moved and carried that we ask the town council to look into the possibility of erecting a rink without a roof at a sport house.

The Board of Trade decided to appoint the Old Timers' dinner and a committee was appointed to report on the next meeting.

Mr. Brown and Mr. Gilbert volunteered to interview raters and get the petition signed asking them to take over hall.

SOME PURITAN CUT-UPS

Those who depend on the regular historical works of the schoolbook type do not have formed the idea that the Puritan forefathers (and foremothers) of New England were as perfect as folk could be. The Incidents have been written again, however, and have dug up some old records which appear to show that human nature was about the same in the old days as it is at present. A recent writer quotes at length from a Massachusetts court docket of 1746, of which a few sample cases are given as follows:

Henry Walton fined for saying he would as leave here a dig here to bad Rev. Rev. Cobblebrook.

John Staley fined for saying that the Puritans were a lot of fools.

Thomas Gray of Marlborough fined for saying that the Puritans were a lot of fools.

Philip Cromwell fined for being in drink three times in two days.

Mr. Griffith fined for saying that his wife was a slut.

Sarah Parviz fined for saying that her husband was a pig.

Miss Ivy Humes, of Drumheller, visited at the home of Mr. and Mrs. P. Hume.

Report all news of interest to this office. They will be appreciated and each item will help to make a paper that much more interesting. We can not get all the news but we will get as much as we can and we think what we wish to do. We want all the news that's worth.

U.G.G. LIMITED DECLARE FIVE PER CENT DIVIDEND

Mr. E. S. Law, President of the United Grain Growers Limited, announced at the conclusion of a meeting of the Board of Directors of the United Grain Growers Limited, that a dividend of five per cent has been declared on the capital stock of the company, for the financial year ended July 31, 1931. Cheques have been mailed to the 30,000 shareholders of the company.

The accounts for the past year are all in the hands of the auditors and are not yet ready for publication, but it is anticipated that the balance sheet will show a strong liquid position and that the earnings for the year, after long interest and depreciation, were sufficient to justify the payment of a dividend.

While a reduction in grain handling during the current crop year is considered inevitable on account of the small crop produced in Western Canada, United Grain Growers elevators are fairly well loaded with respect to grain destined in Western Canada which have from a fair to good crop this year, and there are comparatively few elevators of the country in this district which have experienced crop failure.

It was also stated that a release of farmers from contracts to market grain through other channels is required during this year in an increased percentage of deliveries to United Grain Growers elevators at a large number of points.

United Grain Growers now have 40 country elevators in Manitoba, Saskatchewan and Alberta, a terminal elevator at Port Arthur with a capacity of 1,000,000 bushels, and a terminal elevator at Vancouver with a capacity of 1,000,000 bushels. One of the objects of the company for the past fiscal year was the re-entry of the company into the business of elevating grain, which had been temporarily discontinued.

JOHN THOMAS LLOYD

John Thomas Lloyd, 13-year-old son of Mr. and Mrs. J. T. Lloyd of Arrowwood died Sunday in a Calgary hospital after an illness of five weeks. He was born in Gleichen and had lived in Arrowwood most of his life where he was employed by his parents and his brother. The remains arrived in Gleichen Tuesday morning, the funeral service taking place at afternoon at 3:30 from St. Andrew's Church, which was filled with friends from Arrowwood and Gleichen. Rev. J. R. Davies officiating and interment taking place in the Gleichen cemetery.

The following were noted among the mourners:

Mr. and Mrs. Lord and family; Mr. and Mrs. Leslie Long and family; Mr. and Mrs. Stevenson and family; Mr. and Mrs. Frank Hall; Members of the Arrowwood U.P.W.A. and Mrs. Roberts; Mr. and Mrs. H. R. Sanders and family; Mr. and Mrs. Stott and family; Mr. and Mrs. James Ward; Walter and Ralph Stinner; From John's school: Buddy and Thelma of Calgary; Mr. Allgood and daughter; Mr. and Mrs. Thompson; Mr. and Mrs. Conroy and family; Norah and Thelma Stinner; From John's school: Buddy and Thelma of Calgary; Mr. Allgood and daughter; Mr. and Mrs. Thompson; Mr. and Mrs. Conroy and family; Norah and Thelma Stinner; From John's school: Buddy and Thelma of Calgary; Mr. Allgood and daughter; Mr. and Mrs. Thompson; Mr. and Mrs. Conroy and family; Norah and Thelma Stinner.

CARD OF THANKS

Mr. and Mrs. Lloyd wish to thank their friends for their many kindnesses shown them during their recent bereavement.

Glaciers In Rockies Are Receding

This Seems To Bear Out Theory That Climate Is Becoming Milder

Following observations previously made of glaciers, at the close of the Alpine Club's camp at Prospector's Valley on August 3, the president, H. E. Sampson, of Regina, and the honorary president, A. O. Wheeler, of Sidney, B.C., went to Mount Robson to ascertain the amount of recession of the Robson Glacier. Observations were first made in 1911, at the time of the Alpine Club of Canada's expedition to explore the Mount Robson region. The expedition was then accompanied by a party from the Smithsonian Institution, of Washington, D.C.

Subsequently the measurements have been checked twice, viz: In 1913, at the time of the club's camp at Robson Pass, and again in 1922, by H. F. Lambert, of the Topographical Survey of Canada, a member of the club.

From 1911 to 1913 there had been a retreat of 30 feet, and from 1911 to 1922 a retreat of 265 feet, or an average yearly retreat of 24 feet for eleven years.

Using the same tracks marked in 1911, on which the marks were still distinctly readable, measurements were now made and it was found that in the elapsed twenty years the ice had retreated 667 feet, or 402 feet for the last nine years, an average of nearly 45 feet per year, as compared with 265 feet for the preceding eleven years.

There was also in addition to a general shrinkage, a very remarkable change. In 1911 the ice forefoot of the glacier had sent out two streams, one flowing northward via the Smoky River to the Arctic Ocean, the other southward via the Fraser River to the Pacific. This was all changed. The ice has receded so far on its eastern side, behind a rock rib, that the stream to the Arctic no longer existed, all the run-off from the ice being carried southward to the Pacific. This disposition clearly placed the Great Divide of the Rockies east of the Robson Glacier and Mount Robson undisputedly within the province of British Columbia. New rocks were now marked closer to the ice for future reference, and photographs for comparison with previous ones were taken.

The Tumbling Glacier, which falls very steeply for five thousand feet from the icefield below the final peak of Mount Robson and buries its nose in the waters of Berg Lake, appeared to have shrunk quite a lot in width of its icefall and to have lost much of its hold, precipitous front. It appeared to be as active as ever.

Observations made of the Illecillewaet, Asulkan, Yoho and Victoria glaciers prior to the Alpine Club camp, and of the Robson Glacier after it, tend strongly to show a greatly increased recession of the ice.

Aching CORNS STOP HURTING INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store, 35c.

PUTNAM'S

W. N. U. 1905

within the past ten years; also of a big decrease in volume, as shown by the uncovering of broad rock faces and cliffs where previously the ice was supposed to lie to the depth of hundreds of feet. The results would seem to bear out the theory of a very distinct change to milder climatic conditions moving gradually towards the climax of its cycle.

Seventy Years On Job

Watcher Of Seas Expert In Interpreting Weather Changes

Seven decades ago, in 1861, when the soldiers in blue were marching to fight in the Civil War, a mere youth obtained a job sighting ships and sending weather reports from the lonely Marine Recording Station out on the windswept tip of Cape Cod.

Now, 70 years later, Isaac Small, a lusty old man of 87 years, still holds the same position. With firm step and clear eyes, in raging storm and brilliant sunshine, he strides along the bluff near the station, his keen gaze directed toward the horizon. He is a perennial watcher of the sea, an expert in interpreting weather changes and checking the ships that emerge out of the blue distance.

His hair is white and his face is weather-beaten, but he shows none of the infirmity of age.

During 70 years of continuous service as a watcher of the seas, Isaac Small has seen more shipwrecks, assisted in more rescues, counted more ships and sent more weather reports than probably any other man alive. Out of the windows of his lonely windswept station, he has observed unbelievable changes in the ships whose names fill the pages of his worn and thumb-marked log. Acres of square-rigged, gleaming canvas have been replaced by mile-long streamers of thick, black smoke.

The history of the Marine Recording Station at North Truro dates back to 1796. In that year Isaac Small's grandfather sold to the U.S. Government ten acres of land, facing directly on the Atlantic Ocean. Of that original ten-acre plot, the continual buffeting and erosion of wind and sea have left only four acres, and Isaac Small's front yard is still disappearing at the rate of a foot every year.

Small's regular duties begin at daybreak, and end when darkness no longer permits him to see beyond the cliffs upon which his tiny house is perched. Every ship that appears within the horizon on its way to Boston Harbour is duly recorded by him, and the information forwarded by telegraph to Boston. In former years it was sent to the Chamber of Commerce, but at the present time the notification is given to private tug companies.

Besides this information, the weather bureau must be notified at intervals of every half hour during the day of the meteorological changes and weather conditions existing at the station.

But the hours from daybreak to darkness do not complete Small's working day. He is on call at any hour of the night to spread the alarm of an approaching storm, and if a ship in distress out in the darkness comes to his attention, it is his duty to notify the nearest coast guard station. Two special telegraph wires, a local telephone and a coast guard telephone are the means by which this lone look-out keeps in touch with the rest of the world.

Why Is This Thus?

Woman Doctor Wonders Why New Guinea Boys Play Like Girls

Dr. Margaret Mead, of New York, proposes to analyze the statement that "boys will be boys, and girls will be girls."

She says that in New Guinea she found on a previous trip native boys playing with dolls and taking care of babies with all the enthusiasm of the little girls. Now she is going there again and for two years will endeavour to ascertain why this is thus. Her theory is that boys are simply taught to ignore girlish things in other lands and that they are naturally just as domestic in their tastes as the juvenile femininities. Dr. Mead should take some baseballs and marbles along and then see how much the New Guinea lads will reach for the dolls.

Needed It Later

An American film producer asked an English friend to watch the "shooting" of one of his society films to see that it was all right.

After a time the Englishman asked, "Why does that man keep on his hat when he's talking to a lady in the drawing-room?"

"Sure," said the producer, "he can't take it off—another lady's coming in presently, and he's got to raise his hat to her."

The world's largest snake is the reticulated python, found in the East Indies.

Not An Unknown Country

Contours Of Sea Floor Are Familiar To Geologists

Below the surface of the great oceans there lies more land by far, than is comprised in the area of all the continents. It is not altogether an unknown country. The sea bottom is constantly studied and its general contours are familiar to geologists. It is known, for example, that the Atlantic Ocean lies above an immense plain, surrounded by an incline that rises very slightly for some hundreds of miles to the continental shores. In a few places are mountains under the seas, tops of which are lonely islands. And here and there are extraordinary depressions, deeper by a mile or more than the general ocean bottom.

One of these lies between Cuba and Honduras, and is called the Bartlett Deep. Not much is known of it except that it is two miles deeper than the ocean floor and is like a gigantic crack, a thousand miles long and about fifty wide. It is suspected to be of volcanic origin, and it is thought that seismic disturbances may still begin in its dark depths, four miles below the surface, of the Caribbean Sea. This is a problem of importance, for an uneasy and unreliable fault in this location may make it inadvisable to pursue any further the project of a Nicaraguan Canal. There are some geologists who think it possible that an earthquake in the Caribbean might drain the water from the lakes which are to be linked to form the canal.

The navy proposes to find out as much as possible about conditions and contours in this submarine trench by an exhaustive hydrographic survey. Curiosity concerning the sea bottom might be enough to account for this undertaking, but it has a more practical occasion in the necessity for exact knowledge concerning earthquakes and their effect on the affairs of commerce.

Important Decision Of

King's Bench Judges

Rule That Man Is Twenty-Three Until He Is Twenty-Four

When is a man 23 years of age? Five judges of the King's Bench Division, including the Lord Chief Justice, Lord Hewart, decided in a case that was being appealed in the Criminal Court of Appeal recently that a man is 23 until he is 24. The question arose over a section of the Criminal Law Amendment Act. Lord Hewart asked: "Does not a man cease to be 23 the moment he passes into his 24th year?" Counsel for the appellant submitted that a man was of the age of 23 for a period of 365 days—in other words, he was 23 until he was 24. The Lord Chief Justice announced that on the ground that there was ambiguity in the law the subject should have the benefit of the doubt, and the Court had decided to allow the appeal in behalf of the accused man.

Loudspeaker For Planes

Designed Especially For Use In Fighting Forest Fires

A newly-developed loudspeaker for airplanes, designed especially for use in the fighting of forest fires, has been tried out successfully at Roosevelt Field, New York. The loudspeaker, which weighs 100 pounds, was tried in a Fokker plane piloted by N. C. Brown, who flew at a height of 1,200 to 1,500 feet, circling the field and talking. He was heard clearly over a radius of more than a mile. The speaker uses a wind generator and it will be adapted for use by police, the sponsors said.

Payment In Arrears

Prof. G. P. Lestrade, of Pretoria University, condemns the South African natives' practice of paying in cattle for wives on the instalment plan. Nothing is more calculated to militate against the serenity of marital relations than the consciousness that there are still a few cows owing on the wife.

A Seven Months' Tow

On the longest towing voyage on record a floating dock of 17,000 tons lifting capacity is on its way from the builders in Wallsend, England, to Wellington, N.Z. The tow of 13,500 miles will last seven months. Two powerful tugs are employed and the crew is living on the dock during the voyage.

The ambition of King George V. of England to own the most complete collection of British postage stamps in the empire over which he rules has been realized.

After a girl marries the apple of her eye, he turns out to be a crab apple.

And there's this about a monarchy, the one who is going to rule is taught how to do it.

A Clever Engineer

Long List Of Achievements Credited To Sir Alexander Gibb

Sir Alexander Gibb, who has come to Canada to prepare a report on the ports and harbours, comes of an ancient Scottish family with engineering in its blood. He himself was a pupil of Brunel and Barry, and the list of his achievements and decorations fills a whole column of "Who's Who." They include such widely different undertakings as the dockyard at Rosyth and the wonderful aquarium at the Zoo. During the war Sir Alexander played a chief part in developing the Channel ports for the disembarkation of the army, and he was consulting engineer for the great new naval base at Singapore. He is a keen student of Burns, a member of the ancient King's Bodyguard for Scotland, and belongs to no fewer than ten clubs.

Changed Its Nature

X-Ray Experiment Converts Annual Plant Into Perennial

In experiments to learn more about effects of X-rays upon evolution, an annual plant has been changed into a perennial at Cornell University, Ithaca, New York.

The plant which changed its nature at Cornell is the euchaena, the closest wild relative to corn. There are two species, Mexicana, the annual, and perennis, the perennial.

Some of the seed was exposed to X-rays for a few minutes and then germinated. The young stalk began life as an annual, but later on, while still young, it developed some of the appearances of a perennial. Then the annual portion dried up and disappeared, and the remaining stalk developed into a true perennial.

Trans-Canada Highway

Four Hundred Miles Of New Highway To Be Built Between Kenora and Heron Bay

The decision has been made by the Ontario Government that the trans-Canada Highway will run through the Ottawa Valley to North Bay and will go east from Kenora to Heron Bay. With regard to the intermediate stretch, it has not been decided whether the highway will be routed by Cochrane or Sudbury. In the stretch between Renfrew county and North Bay, there will be a partial re-location over a stretch of 100 miles. In the western section, between Kenora and Heron Bay, 400 miles of new highway will be built.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Brandon Industrial Survey

Facts Collected Will Be Published In Booklet Form

Brandon's most comprehensive industrial survey recently completed by Prof. Burton Hurd of the Manitoba College, for the use of the Brandon section of the Industrial Development Board of Manitoba will be partially published in booklet form. Facts concerning the city, not previously available, are given in a concise and interesting manner, and should be of special interest to industrial firms contemplating a site in the West.

Poland expects to receive \$2,000,000 from its state lottery this year.

MINARD'S

"KING OF PAIN"

LINIMENT

Troubles Of Occident Diagnosed By Oriental

Western World Needs Philosophy and Not Money Opinion Of Chinese Merchant

The Orient, through the eyes of K. C. Li, one of the world's leading Chinese merchants, with traditions of 4,000 years of business behind them, has looked at the Occident and diagnosed its troubles.

Philosophy, not money, is what is needed in the Western world. There are other serious dislocations, but time will cure them, Mr. Li said smilingly.

Seated in his modern office toward the top of the Woolworth Building, surrounded by a barrage of telephones, electrical refrigeration equipment and other accessories to Western business, Mr. Li lent an Oriental touch to his conversation by wearing a silk mandarin coat. Meanwhile he calmly directed the business of the Wah Chang Trading Co., a leading dealer in antimony, and answered a few questions on Chinese trade put to him by an international banker. He referred frequently to the latest treatises on economics.

"The chief difference between Oriental and Occidental psychology is money," he said. "In the Anglo-Saxon world, if a man loses his money he has lost all; in China, loss of money is a mere incident. Our philosophy places life first and reputation second, with material things, like money, a mere incident."

"It is because of this stress on money that we in this country emphasize the depression too much, and thus make it worse," said Mr. Li.

"I do not need to go back to China to get the answer," said Mr. Li. "I need only to refer you to your own Mark Twain, a real philosopher, who said, 'The difference between prosperity and panic is only 15 per cent.'"

Stabilization of silver, cancellation of all reparation payments and lowering of the world-wide tariff walls are other important steps toward bringing things back to normal, said Mr. Li, but restoration of a calm, assured attitude is the most important step. Other reforms will come in time, he said.

"I venture to say that the American people are a million times better off in material things than the Chinese at the present time," said Mr. Li. "Yet I doubt that they are much happier."

"Because they have not quite as much money as before the Americans are seeing ghosts in the daylight. They are afraid of what might possibly happen. They start to curtail expenses. The butcher, the baker and the grocery man are affected. He cuts down his orders. Trade slumps more. It is a vicious circle," said the Chinese merchant.

Makes Convicts Superstitious

Grass Will Not Grow On Murderer's Grave In Leeds Prison Yard

In the murderers' graveyard of Armley Jail, Leeds, England, a brown patch stands out in sharp contrast with other grassy mounds. It is the grave of Lee Doon, a Chinese laundryman, who was hanged eight years ago for the murder of his partner, Sing Lee. All efforts to grow grass on the plot have failed. So planted on the grave by prison workers died. Expert gardeners have sown seeds on the mound, but they never grew. Every new warden, anxious to dispel superstition increasing among the convicts, has experimented with new methods, but the patch remains barren. While waiting for the day of execution, Doon ate heartily. He insisted on many plates of ham for breakfast, chicken and rice for dinner, two glasses of beer a day and innumerable cigarettes. His fondness for tobacco was displayed on the execution block when the hangman was forced to remove a half-smoked cigarette from Doon's lips before he could adjust the cap and pull the lever. To his spiritual adviser the Chinese said he would return to earth in 18 or 20 years, but not, he said he hoped, as a Chinese.

Conditions In Egypt Ideal For Aviators

Climate Has Been Proved Most Suitable For Flying

Recent aerial events in Egypt have thrown much light on the great suitability of the Egyptian climate to aviation. Pilots rarely complain of atmospheric conditions being prejudicial to flying, and this leads to the hope that Egypt will one day not only become a great aviation centre or halfway aerodrome for the world, but will provide an ideal spot for the establishment of an international school of aviation.

A big electrical company has found that reducing the thickness of its filing cards by a hair's breadth has saved space in its offices equal to a roomful of clerks.

New Material Found

Canada May Soon Be Able To Manufacture Mineral Wool

The important discovery that certain deposits of rock in the Niagara district of Ontario are suitable for the production of rock wool, a valuable insulating, lining and covering material, features a report issued by the mines branch of the Department of Mines. The report, by M. F. Goudge, deals with the possibility of establishing an industry in Ontario and manufacturing rock wool, which is classed as one of the most effective insulating materials known.

Rock wool, or mineral wool, as it is sometimes called, the report states, is not manufactured in Canada at present, as hitherto suitable raw materials were not known to exist within the Dominion. It is made from shaly limestones which possess certain definite characteristics. Research carried on in the laboratories of the mines branch by Mr. Goudge, indicate that several deposits of impure limestone outcropping at various places between Niagara Falls and Hamilton are suitable for making rock wool.

In the process of manufacture, the natural rock is mixed with coke and charged to a small blast furnace where it is melted. The molten rock issuing in a small stream from the base of the furnace is blown into a myriad of small globules by a blast of high-pressure steam. As the molten globules hurtle through the air each develops a very thin, pliable glassy fibre behind it. This fibre is known as rock wool.

The discovery of the suitability of the Niagara district rock for the manufacture of this commodity suggests the possibility of a new and valuable product being added to the mineral production of Canada, the report states.

THE RHYMING OPTIMIST

By Aline Michaels

THE GLEAM ALONE

The friends whom I most love
Are like the stars to me,
As those far bodies move
Along immensity.

The stars are worlds, we know,
And worlds hold joy and pain,
Hold ecstasy and woe,
And purity and stain.

But of those worlds afar
We see the gleam alone;
The glory of the star
That on our path has shone.

And so in friends most dear
I see no fault, no blight,
But only joyous bloom
And opulence of light!

Should Be Congratulated

Woman In California Keeps Employees Regardless Of Age

There is a very special and particular achievement for which Mrs. Mary K. Solari deserves congratulations, entirely aside from the fact that she has just completed her twenty-fifth successful year in the restaurant business in San Francisco. That is the stand that she has taken, as a business woman and as a human being, against the theory of "firing after forty," which has become so lamentable a practice in businesses and industries throughout the United States.

Out of eighteen employees, four have been with her more than twenty years; five, over fifteen years; four, over ten years, which, in a staff of that size, is an extremely high percentage of long service.

Business women may justly feel proud that another business woman has taken up the cudgels so vigorously against this ruthless pushing aside of the so-called middle-aged without consideration of ability or intelligence.

A Good Investment

Comment has been made on the vast waste among beekeepers through the use of poor equipment. Well made hives with good frames of correct size are a good investment. Once combs are built they can be exchanged from hive to hive and used anywhere as needed. One is amazed to find the extent of the use of makeshift hives and frames.

New Source Of Revenue

Among the emergency bills sent to the Uruguayan congress and designed to help solve the financial crisis there is one requiring privately owned automobiles to pay from 20 cents to \$1 daily according to size for a permit to operate. Permits would be issued in the form of a large sticker with the day's date, pasted on the windshield.

WHEN GASTRIC JUICES FAIL TO FLOW

You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric—or digestive—juices fail to flow. Your food, instead of being assimilated by your system, simply collects and stagnates inside you, producing harmful acid poisons. What you need then is a tonic—Nature's own tonic—Nature's six mineral salts.

You get all these six salts in Kruschen Salts, and each one of them has an action of its own. Together, they stimulate and tune up the bodily functions from a number of different angles. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again in the intestinal tract certain of these vital juices which deal with partially digested food and prepare it finally for absorption into the system.

So you see there is no mystery about Kruschen. It works on purely scientific and well-known principles. Prove it for yourself.

Little Helps For This Week

"Except ye become as little children, ye shall not enter into the kingdom of heaven."—Matthew xvii, 3.

Except your Father lead you, You cannot find the way. Among the snares and pitfalls, The lures that lead astray; Except you be like children, And hold the skirts of love, You'll miss the narrow pathway That leads from earth above.

—Mary Frances Butts.

Blessed are ye if ye become as a little child, for a child is the visible likeness of the Lord Himself. And there is a blessedness in perceiving this truth: the blessing is the truth itself. He who sees the essential in the child—the pure childhood—sees the essence of grace and truth; in a word, real childlikeness. —George MacDonald.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Market For Alberta Coal

Orders For 55,000 Tons Received From Winnipeg Firms

Investigation of the quality of various Alberta coals with a view to determining the fuel best suited to the requirements of the Winnipeg City Hydro-Electric is being undertaken by G. W. Oliver, fuel engineer for the City of Winnipeg. It is pointed out that Winnipeg will be in the market during the coming winter for about 40,000 tons of coal for its central heating system and the contract will be placed with various Canadian companies. Orders for 55,000 tons of Alberta coal have been placed recently by large Winnipeg concerns.

Crude Oil Satisfactory

Upward of 200 barrels of crude oil per day are now being taken from the Ribstone wells for the use of the Canadian Pacific Railway in their locomotives on the mountain division between Calgary and Field, B.C. The railway company is stated to have found the fuel from the Ribstone area in eastern Alberta highly satisfactory and is likely to increase its acquisitions in the near future.

Expects Stork in July

"I Suffered such Pain"

"MOTHER advised me to take the Vegetable Compound because I suffered such pain each month."

"It helped me so much that after I married I still took it. I am expecting a little one in July and I depend upon Vegetable Compound. My sister takes it, too."

Mrs. Aubrey S. Smith, P. O. Box 14, North Sydney, Nova Scotia is only one of thousands of women who depend on Vegetable Compound to carry them over difficult times. Won't you try it, too?

Don't Grope in the dark

MANY do their buying as though they were blindfolded -- "I'll try this" or "I think this will do." These have only the vaguest idea of what they want as they spend large slices of the family income. Others read the advertisements regularly and buy with their eyes open. They know what they want before they go to buy.

Advertisements are beams of light on merchandise. They reveal to you the latest and best products and improvements of the manufacturers and merchants.

Advertisements are a record of progress. They are interesting and instructive news of the business world. They light the way to better buying. Read advertisements regularly and live better at less cost.

Town District

A heavy frost struck the district Sunday night.

The Indians are busy travelling the roadway on the reserve from the Gleichen school to the railway track.

Schultz is over for the season. What will we argue about now?

A bread was struck down over the week-end. The Red & White are selling five loaves for a quarter.

The officials of the Blackfoot reserve are not granting permits to shoot at Stobart lake this year.

The town streets were dragged last Friday which made a great improvement in their appearance.

Owing to the danger from freezing the council contemplate to turn off the water in the irrigation pipes by the 10th instant. Everyone should take notice of this and get all the work they need before that time. The taps should be protected at night until the water is turned off as it does not take much frost to destroy these taps.

The sidewalk on Crowfoot Street Tuesday received a new coat of cement to fill up the numerous holes in the walk.

Mr. J. Christensen presented the Call with a basket of vegetables Tuesday. We have not yet had time to sample them but from their looks they will make fine eating.

The local duck hunters report having had good luck Tuesday afternoon on the opening day.

Last Monday Jack McHugh had his car runaway starting from Wm. McQueen's oil shed. They sailed down the Gleichen streets hitting the high wall. The only damage done was when they tossed the gas drums from the wagon onto the ground.

St. Andrew's W. A. will have a bridge and what drive over the butcher's shop, on Friday, September 18th, at 8 p.m. Admission 50c.

The work of building some ten kitchen to houses on the Blackfoot reserve started Monday. Carpenter Scott and Thompson have the job and later on they will build a new home for Ck Lewis of the Indian Department.

Doug Matton left last week for Calgary to attend the Normal school.

Hugh Hamar returned to High River last Monday after spending two weeks vacation in Gleichen visiting his parents.

Next Saturday, September 10th at air circus will be held in Gleichen on for the auspices of the Canadian Legion.

As we go to press word has been received that Mrs. Wm. Service, St. formerly of Gleichen died in a Calgary hospital. The funeral will take place at Gleichen on Thursday afternoon.

Miss E. Brown returned home last Thursday evening from Didsbury where she had been employed for sometime.

Rain held up harvesting and corn binning most of last week.

On Sunday next September 20th The Gleichen Baptist church will hold their usual weekly service in the Gleichen Community Hall at 7:30 p.m. to be conducted by Wm. Abernethy, A. A. O. to the Frophetic Bible Institute, Calgary. All are cordially invited. After the regular service the Communion Ordinance will be observed.

The 1928 dollar is now worth \$1.55 in buying clothes. \$1.25 in purchasing shoes, \$1.72 in paying the electric light bill, \$1.29 in building a home and \$2.19 in replacing the worn tires on the family car, according to the results of a survey announced on the 28th.

Here and There

One thousand men will be employed and over \$200,000 expended on highway repairs in Cape Breton and Richmond counties, Nova Scotia, during the coming autumn.

Miss Pauline Garon, Montreal movie-picture queen, formerly of Hollywood, sailed on the Canadian Pacific liner "Mantana" recently, to make pictures in England and France.

Salmon taken in 1930 from British Columbia waters totalled close on 27,000,000 weighing more than \$16,000,000 pounds. Number of fish was 9,600,000 more than in the highest previous salmon catch year of 1926.

The New Brunswick Government is preparing to face the problem of unemployment on a practical basis this winter and has instituted a registration system through city and town clerks, who will gather full data as to out-of-work and their families.

Sir Lionel Fletcher, captain of the British rifle team, which competed against Canadian shooters at Toronto and Ottawa, following the historic Bury meeting, was sworn in as a member of the 17th Scottish Highlanders, on his return to England. It is hoped that another Old Country team will compete in Canada next year.

Queen Helene of Roumania and her sister, Princess Irene of Greece, arrived in London, England, on a shock recently, by travelling from London to Scotland, third class. The Queen suitably declared that she was not comfortable and did not want people to know she was travelling.

The name of Admiral of the Fleet Earl Jellicoe has been added to the long list of names of admirals who have served over Canadian Pacific steamship and mail lines. "His Lordship" arrived in Montreal on August 22, on the liner "Dorchester" and will anchor off the Canadian National Exhibition, at Toronto.

Hector MacDonald, of Montreal, was winner of the prize offered by E. W. Beatty, chairman and president of the Canadian Pacific Railway, for the construction of Federal Enclaves at Seattle. They represented the 17 Scottish Highlanders of Canada. At the Highland Gathering recently held in the grounds of the Blair Athol Hotel, Inverness, Scotland.

Among recent guests at Banff were Congressman and Mrs. Frederick R. Lohrback, of Washington, D.C., and Newark, N.J., on their way to the convention of the National Federation of Federal Enclaves at Seattle. They represented the 17 Scottish Highlanders of Canada. At the Highland Gathering recently held in the grounds of the Blair Athol Hotel, Inverness, Scotland.

It is Mr. Kline's prediction of St. Paul, Minnesota, by Queen Rhamph, who has been visiting in the city, has been seeing real western life, with its rugged and picturesque scenery. He was recently made a member of the Trail Riders of the Canadian Dominion, following a tour of the Canadian Dominion, which included a ride to the Canadian border, and a ride to the Canadian border, and a ride to the Canadian border.

The Nova Scotia fish catch for December last was 12,161,266 lbs., having a landed value of \$248,111, 700 lbs. with a value of \$123,560, the corresponding month of the previous year.

Total amount of capital invested in Canada from other countries as at the end of 1930 was \$2,712,131, 000, an increase of \$229,000,000 as compared with the total at the end of 1929. Of this outside investment, 61 per cent. is held by the United States; 25 per cent. British; and 4 per cent. from other countries.

The yield of potatoes in Canada in 1930 totalled 1,000,000 bushels from 37,600 acres, an average yield of 26.6 bushels per acre. In 1929 the yield was 68,500 bushels from 34,777 acres, an average yield of 32 bushels per acre. Potatoes are growing in large commercial quantities in every province of Canada.

The Canadian Pacific Railway has announced placing of orders with the Algoma Steel Company of Sault Ste. Marie for 30,000 tons of 120 lb. steel rails for spring steel, representing a value of approximately \$1,000,000. The material is to be used in the construction of the new railway line through the Westland Canal in the spring of 1931.

Prescott, Ont., Canada's newest national port, is rapidly approaching completion. The \$1,000,000 terminal which the Canadian Government is building, is turning point for the Upper Great Lakes and will be used to come down through the Welland Canal in the spring of 1931.

Canoeing history was made at Quebec recently when the seven Lavoie brothers piloted their craft over the low-watered waters of the St. Lawrence between Quebec and Lenoir in the remarkable time of 11 minutes, 41 seconds, and took first prize in the canoe race which was one of the features of the Quebec Winter sports season with headquarters at the Chateau Frontenac.

In France wheat is selling at \$1.45 per bushel and here 25c.
